RESULTS NOT WHAT YOU HOPED?

- Think a grade is wrong? Ask your school about a CXC script review right away. The window is only a few weeks.
- Rewrite as a private candidate at the Examinations Division or your Regional Education Office. Bring your birth certificate and a photo.
- Missing English or Maths for UG? Sit UG's Qualifying Exam or do an IDCE foundation course instead of waiting a year.
- From age 18, GOAL's GROW programme leads to a bachelor's degree even without five passes.

CHOOSING SUBJECTS

- Always take English A and Maths.
- Health, engineering or tech: take at least two sciences. Chemistry plus Physics or Biology will keep the most doors open.
- Agricultural Science and Food & Nutrition don't count as sciences for UG science programmes.
- CAPE: work backwards from the programme you want. Grade III or better is the usual target you should aim for.

NOT SURE WHAT YOU WANT?

Give **Navi** a try, our free career navigator at nextstepgy.org. See your options and the qualifications you need for your dream career.

WHAT WE OFFER

A free, student-led platform that connects Guyanese students with near-peer mentors, meaning those who were recently in their shoes.

Mentor-led sessions
Watch videos online and join virtual group sessions matched to your interests and questions.

Guyanese mentors
Top CSEC and CAPE performers, valedictorians and professionals in medicine, law, engineering, business, finance and more.

Subjects, universities and scholarships
Help choosing CSEC and CAPE subjects, applying to UG, universities abroad and finding scholarships.

Leadership and career support
Youth Parliament and Youth Ambassadors, résumé and LinkedIn feedback, internship applications and time management.

CSEC & CAPE

FREE · STUDENT-LED · ONLINE

- ✓ **Mentor videos with tips on CSEC, CAPE, university and career preperation.**
- ✓ **Ask anything: subjects, results, UG, careers, scholarships or studying abroad.**
- ✓ **Online and in-person Q&A events with speakers from many industries.**

CHOOSE. DREAM. ACT.

NEXT STEP GUYANA

AT THE UNIVERSITY OF GUYANA

What do I need to get in?

CSEC passes mean Grades I to III.

Medicine (MBBS, 5 years)

Three CAPE passes from Biology, Chemistry, Physics or Maths, with Grade III or better in two.

Law (LLB, 3 years)

Two CAPE subjects (4 units) plus CSEC English at Grade I or II, or a pre-law first year at UG with a 3.0 GPA.

Engineering

Five CSEC passes including English, Maths and Physics. Petroleum Engineering also needs Chemistry.

Computer Science

Five CSEC passes including English, Maths and Information Technology.

Biology and health sciences

English, Maths, Biology and another science.

Business and accounting

Five CSEC passes including English and Maths. Principles of Accounts and Principles of Business helps.

TWO ROUTES INTO MEDICINE

CAPE route: Lower and Upper 6th with the right sciences, then apply.

CSEC route: a BSc in Biology first, earn a 3.0 GPA in Year 1, then apply.

OTHER ROUTES

Beyond UG

Teaching (CPCE)
Five CSEC passes at Grades I to III, including English and Maths.

Nursing (Ministry of Health)
Five CSEC subjects including English and Maths.

Agriculture (GSA)
Free tuition. Diplomas and certificates at Mon Repos and Essequibo.

Technical training
Electrical, welding, plumbing, construction and more at GTI, GITC, BIT, GTTC and other institutes.

THE BIG QUESTION

Should I do CAPE?

CAPE is the Caribbean's equivalent of A-Level: two years across Lower and Upper 6th, with subjects in units. Many universities ask for Grade III or better.

DO CAPE IF

- Your programme or scholarship asks for it, like direct entry to UG medicine
- You plan to study at UWI or abroad
- You want more time before choosing a career

MAYBE SKIP IT IF

- You already meet the CSEC requirements for your UG programme
- You want to start your degree two years sooner (UG tuition is free)

Bonus: pass 10 CAPE units, including Caribbean Studies and Communication Studies, and CXC awards an associate degree.

GOING OVERSEAS

Studying abroad

Ideally, you should start researching about a year before you want to begin.

UWI (the Caribbean)

- Good if your programme is not offered or not accredited at UG
- Usually needs CAPE or A-Levels
- Campuses in Trinidad, Jamaica, Barbados and Antigua, plus online

Canada

- Apply through OUAC (Ontario) or directly, usually October to January
- You need a study permit and, for most undergraduates, a Provincial Attestation Letter
- Budget at least CAD $23,448 a year for living costs, plus tuition
- Look for scholarships like U of T's Lester B. Pearson

United States

- Apply through the Common App and ask for fee waivers if eligible
- Many colleges give need-based financial aid to international students
- After admission: Form I-20, then an F-1 visa interview in Georgetown
- Free advising at EducationUSA, U.S. Embassy Georgetown
